REPOSITORY
github.com/skh0035/Mini-AI-repository

OUR MISSION

Make symbolic AI clear for beginners, through one connected learning kit built by seven minds from five Silk Road countries.

E

F

TEAM ROSTER&ROLES

CEO

ID 1820262286

Hayat Afandiyeva

STRONG	Decision-making & leading projects
GROWING	Programming fundamentals and Computer Science knowledge

CIO

ID 1820262026

Sarvarbek Khaydarov

STRONG	IT and engineering
GROWING	Social skills

QUALITY LEAD

ID 1820262239

Arsalan Nabizadehshahrbabak

STRONG	Python programming, spotting errors
GROWING	Project management and feedback

VISUAL DESIGN LEAD

ID 1820262290

Mukhammadshakhruz Mukhtarov

STRONG	Visual creativity, eye for aesthetics
GROWING	Interactive UI/UX design

VISUAL DESIGN & VIDEO LEAD

ID 1820262244

Anel Kenzhebolat

STRONG	Python programming, AI projects
GROWING	Video editing, slide design, visual communication

CONTENT LEAD

ID 1820262210

Aliya Egemberdiyeva

STRONG	Focused, structured, and easy-to-follow content
GROWING	Knowledge of how software and AI work

VIDEO LEAD

ID 1820262172

Madi Bakatov

STRONG	Creative thinking, visual storytelling
GROWING	Video editing, filming, multimedia production

7 5 1

MEMBERS · COUNTRIES · MODULE

WORKLOAD DISTRIBUTION

Tasks follow each member's strengths and leadership role, so the workload stays fair and balanced.

01	Coordination, timeline & strategy	**Hayat**	CEO
02	Technical implementation & IT	**Sarvarbek**	CIO
03	Accuracy & quality standards	**Arsalan**	QUALITY
04	Topic research & written materials	**Aliya**	CONTENT
05	Visual design & slide layouts	**Mukhammadshakhruz · Anel**	DESIGN
06	Video editing & media production	**Anel · Madi**	VIDEO

ALL 7 Every member joins the core subject research and the final presentation review.

SECTION B

B Project Scope & Learning Goals

TARGET LEARNERS

Fellow students and people with a general academic background, but little to no experience in computer science, programming or AI.

- General academic background
- Little or no coding, CS, or AI experience
- Everyday computer literacy: files and web
- Foundational logical reasoning

> *No prior knowledge of programming languages, hardware or complex AI models is required.*

A

LEARNING GOALS

After using our materials, learners should be able to:

01
Define
symbolic AI and general software concepts

02
Explain
the logic and rules behind symbolic reasoning

03
Contrast
symbolic AI with other AI methods

04
Identify
realuses where symbolic AI meets standard software

B

CONTENT OUTLINE & BOUNDARIES

2 *short warm-up blocks, then a deep dive into the logic and the real world.*

C

01
BRIEF INTRODUCTION
Introduction to Software
How software works, as a short warm-up

02
BRIEF INTRODUCTION
History of AI: The AI Winter
The context behind symbolic AI

D

03
DETAILED EXPLANATION
Core Concepts of Symbolic AI
A detailed look at logic and rules

E

04
DETAILED EXPLANATION
Integration with Modern Software
How symbolic AI connects with today's software, with real-life examples

F

DEPTH — Brief introduction — Detailed explanation

SECTION C

Planned Learning Resources & Mini Lecture

One topic - five ways to learn it. Each format plays a different role.

01

Shared Markdown Content

The foundational theory, organized like a mind map with clear headings, and expandable branches.

ROLE Foundational theory for every format

- Mind-map branches
- Color-coded themes
- Embedded links
- Interactive nodes

02

Study Guide & Test Bank

Summaries of key concepts and a glossary, plus a varied test bank for self-assessment.

ROLE Ultimate review and self-assessment

- Glossary
- Multiple choice
- True / False
- Drag-and-drop
- Open problems

03

PPT Slides

Highly visual, structured slides to summarize key theories and keep learners engaged.

ROLE Visual summary for lectures

- Clickable navigation
- Animated logic
- Mini-quizzes

04

Video Tutorials

Interactive videos with story telling and branching paths. Viewer choices change the flow.

ROLE Scenario-based practice of the theory

- Branching story
- Algorithms in action
- Embedded quizzes

05

Live Mini Lecture

Building a simple rule-based expert system, live with the audience

SEE NEXT PAGE →

05 · LIVE MINI LECTURE

TOPIC

Building a Simple
RULE-BASED EXPERT SYSTEM

WHY IT MATTERS

It shows symbolic AI in practice, not only in theory.

ACTIVITY

A gamified live exercise. The audience acts as the "rules engine" and solves a logic puzzle.

IF
a fact matches a rule

→

THEN
the rule fires

→

DECISION
a new conclusion

RESOURCE INTEGRATION

One knowledge base. Every resource grows from the same Markdown core.

Markdown
Foundational theory text

PPT Slides
Visual summary for lectures

Video Tutorial
Interactive, scenario-based practice

Study Guide
Final review & self-assessment

CENTRAL PLATFORM
Lexue or GitHub

LEARNER JOURNEY

01 · READ
Markdown
Learn the theory

02 · SEE
PPT Slides
Visual summary

03 · PLAY
Video Tutorial
Make choices, try it

04 · CHECK
Study Guide
Review and self-test

SECTION D

Workflow, Schedule & Coordination

CONTENT DEVELOPMENT

PHASE 01	PHASE 02	PHASE 03
Research	**Draft**	**Review**
Deepresearchand vetting of reliable sources	Drafting content and writing scripts	Peer reviewand fact check before media production

GitHub usage

Central repository for Markdown files and project tracking.

- GitHub Projects · Kanban
- Structured commits
- Pull requests
- Version control

SK Sarvarbek Khaydarov — CIO

Communication

DAILY	WeChat group for updates, quick questions, and reminders
DAILY	Short meeting for a progress check
WEEKLY	In-depth brainstorming and progress review
LIVE	Google Drive for real-time co-editing

7 Whole team, led by Hayat — CEO

Quality assurance

Strict peer review: every deliverable is checked right after completion. The Quality Lead runs a standard checklist before final submission.

- Accuracy
- Design consistency
- Interactivity

AN Arsalan Nabizadehshahrbabak — QUALITY

Risk management

→ Member falls behind: quick contingency meeting to reassign tasks or give support

→ Mid-deadline reviews catch delays early

→ Regular backups to Google Drive and GitHub

HA Hayat Afandiyeva — CEO

SECTION E

Master Task List

6	4	7	EXTERNAL TRACKER
TASKS	WEEKS	MEMBERS	github.com/skh0035/Mini-AI-repository

TASK · RESULT · OWNER	WEEK 1	WEEK 2	WEEK 3	WEEK 4
01 **Initial Research & Data Collection** Research document · Egemberdiyeva Aliya ↳ None	IN PROGRESS			
02 **Draft Markdown & Study Guide Content** Completed.md files · Egemberdiyeva Aliya & QA ↳ Initial Research		IN PROGRESS		
03 **Create PPT Slides & Visual Assets** Completed PPT & graphics · Mukhtarov & Kenzhebolat ↳ Draft Markdown			NOT STARTED	
04 **Record & Edit Interactive Video** Video with quizzes · Bakatov & Kenzhebolat ↳ Draft Markdown, PPT			NOT STARTED	
05 **Setup GitHub & Upload Markdown** Live repo with content · Khaydarov Sarvarbek ↳ Draft Markdown				IN PROGRESS
06 **Final QA Review & Project Finalization** Approved final deliverables · Nabizadehshahrbabak & Afandiyeva ↳ All tasks				NOT STARTED

● Bar = internal deadline week. ↳ = depends on. Current status of all tasks: Not started.

F Submission & Evidence

GitHub repository

github.com/skh0035/Mini-AI-repository

AI use records

We used AI to synthesize and structure the project plan, make templates and sketches, distribute the workload across roles, and format the master task list.

Old routes. New roots.

FIVE CULTURES / SHARED CURIOSITY / INTELLIGENT POSSIBILITIES
